

NEXT GENERATION CM/ECF (“NEXTGEN”)

... DATE TO BE DETERMINED

[Presenter: Julie Gibson, DQA/Trainer]

While the U.S. District Court for the Northern District of Florida has migrated to NextGen CM/ECF, the bankruptcy court for the Northern District of Florida has not, nor do we have plans to do so in the immediate future. There were problems discovered in the bankruptcy version that we determined to be critical issues locally and we have opted to delay migration until these issues are resolved.

Once we begin the planning process, you will be advised of the migration schedule well in advance and we will provide you with instructions for upgrading your CM/ECF account. We will provide these notifications and instructions through emails, articles in The Bankruptcy Advisor newsletters, and announcements on our website.

To be sure you receive this information timely, make sure that the “uscourts.gov” domain is on your email’s “safe” list. When I send an email to all of you, it goes to nearly 5000 people so many email programs flag it as spam if we’re not on your safe list.

Also, be sure to sign up for the RSS feed on the home page of our website so that you receive immediate notification of all announcements posted there.
